

Zorki 4K the rangefinder camera with the optical extra*

Zorki 4K – the inexpensive way to limitless photographic versatility. A very fine 35mm rangefinder system camera, with a rugged, good-looking body wrapping up a remarkable specification. The standard lens is the famous Jupiter 8. Shutter speeds are 1-sec to 1/1000 sec. Flash synchronisation and delayed action. Excellent coupled rangefinder/viewfinder with trued image and built-in dioptric focusing eyepiece. Single-stroke lever wind advances film and resets shutter. Anchored easy-loading take-up spool. But that's not all! The leica-threaded lens mount takes all the fine Russian lenses and accessories illustrated here. The Zorki 4K opens the way to a truly professional range of photo potential.

and it costs only £26.89

All prices shown are recommended retail inc VAT

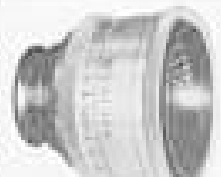

The Zorki 4K has a built-in dioptric control in the rangefinder which enables adjustment to be made for individual eyesight. It has of course the other optical extra shared by all U.S.S.R. cameras – that extra-special quality for which the Russian optical industry is justly renowned. Quality not only in the brilliant lenses, but in the precision engineering which accompanies them. And quality at a price you can afford. Choose a Zorki 4K.

Jupiter 11 (F) 135mm, 1:4 telephoto lens £22.77

Jupiter 9 (F) 65mm, 1:2 portrait lens £20.25
